SUMMARY

Full Stack Web Developer with a bachelors in International Business Administration seeking to learn more about the programming world. A month before graduating from Florida International University, the pandemic hit and an opportunity to take on a new challenge arose with the University of Miami Full-Stack Development Bootcamp. With a past of building computers for family members, the next step was to explore the world of website development. After working in the hospitality and production industry for the past 6 years there are skills that are transferable into the tech industry such as: listening to those that are more knowledgeable in order to learn new skills at a faster pace, communicating with a team to achieve a mutual goal, and adapting to new environments along with any problems that may have been unfamiliar in the past.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, SQL, NoSQL
Applications: MySQL, MongoDB, GitHub, Heroku
Tools: Bootstrap, Google Fonts - Icons, Font Awesome, Materialize, Node.js, Express, Handlebars, React

PROJECTS

Note Taker | RepositoryLink: https://github.com/jceb30198/Note_Taker |
Deployed Link: https://ancient-island-96365.herokuapp.com/
- An application that allows the user to write down notes, save them to view later, and once the notes are done being used they can be deleted
- Tools/Languages: HTML, CSS, Bootstrap, Font Awesome, JavaScript, jQuery, Node.js, Express.js

Mood Queue | https://github.com/jceb30198/Mood_Queue |
https://jceb30198.github.io/Mood_Queue/
- **Tools/Languages**: HTML, CSS, JavaScript, jQuery, Materialize, Deezer API
- **Authors:** Jack Ceballos, Tomas Utreras, Nicholas Monplaisir
- An application where the user is able to click on a mood and find music to satisfy how they are feeling at the moment, the user is also able to search for any artist they prefer and listen to a sample of their song

Handlebars Burger | RepositoryLink: https://github.com/jceb30198/Handlebars_Burger |
Deployed Link:https://limitless-forest-28943.herokuapp.com/
- An application that allows the user to add burgers to a "to eat" list and once the eat button is clicked the burger will go into the "devoured" list

Employee Manager | https://github.com/jceb30198/Management_System
- **Tools/Languages**: JavaScript, Node.js, Inquirer, MySQL, SQL, Console.Table

- A command line application that helps the user manage their employees along with the roles and departments that might be involved in the user's company

Weather Dashboard | Repository Link: https://github.com/jceb30198/Weather_Dashboard| Deployed Link: https://jceb30198.github.io/Weather_Dashboard/
- A web application that allows users to search the weather for their city of choice
- Tools/Languages: HTML, CSS, Bootstrap, Font Awesome, JavaScript, jQuery

EXPERIENCE

Lead Cellar-Man 2020 – Present
Unbranded Brewing Company Hialeah, FL
- Reduced product loss in order to optimize production output to 150-200 BBLs per month
- Communicated with the brewing team to plan production days and ran key metrics related to final product volume
- Organized the packaged product in the walk-in refrigerator while preparing and sending orders for distribution
- Monitored all products inside fermentation vessels and brite tanks until they were ready for packaging
- Maintained production responsibilities alongside the head brewer in order to meet the product yield goal

Cellar-Man 2019 – 2020
MIA Beer Company Miami, FL
- Met with the production team at the start of the shift to discuss the plan for the day
- Maintained in-house and distribution inventory to report to the sales team
- Transfer finished product to prepare for packaging
- Report to the production manager everything done during the shift
